Правильный отве	
hub	
	Вопрос 2
Верно	
Баллов: 1,00 из 1,00	
Write the correct v	word
vviite the correct v	vora.
	ree of network topology that includes at least three specific levels in a topology hierarchy. Such topologies are valued for their essibility for troubleshooting.
Scalability and acce	Salarity for troubleshooting.
Ответ: tree	✓
Правильный отве	T: tree

Begins Entropy 100 to 1.00 Choose the correct word and complete the sentence. Violating security measures or causing its interruptions is highly inappropriate. ② a. bridge ③ b. network Baul other septimal. Правильный ответ: Верно	Вопрос 3
Violating security measures or causing its interruptions is highly inappropriate. a bridge b. network Baw orset sep+silf. Правильный ответ: network Bonpoc 4 Beptio feating 1,00 to 1,00 Write the correct word topology is a specific kind of network topology in which all of the various devices in the network are connected to a single cable of line. Other Bus Bonpoc 5 Beptio Feating 1,00 to 1,00 Write the correct word topology is a specific kind of network topology in which all of the various devices in the network are connected to a single cable of line. Other Bus Write the correct word topology is a specific kind of network topology in which all of the various devices in the network are connected to a single cable of line. Other Bus Write the correct word networking is a type of network topology in which a device (node) transmits its own data as well as serves as a relay for other nodes. Routers are used to provide the best and most efficient data path for effective communication. In the event of a hardware failure, many routes are available to continue the network communication process.	
Violating security measures or causing its interruptions is highly inappropriate. a bridge b. network Baw orset sep+silf. Правильный ответ: network Bonpoc 4 Beptio feating 1,00 to 1,00 Write the correct word topology is a specific kind of network topology in which all of the various devices in the network are connected to a single cable of line. Other Bus Bonpoc 5 Beptio Feating 1,00 to 1,00 Write the correct word topology is a specific kind of network topology in which all of the various devices in the network are connected to a single cable of line. Other Bus Write the correct word topology is a specific kind of network topology in which all of the various devices in the network are connected to a single cable of line. Other Bus Write the correct word networking is a type of network topology in which a device (node) transmits its own data as well as serves as a relay for other nodes. Routers are used to provide the best and most efficient data path for effective communication. In the event of a hardware failure, many routes are available to continue the network communication process.	
Ваш ответ верный. Правильный ответ: network Варне Валоов 1,00 из 1,00 Write the correct word topology is a specific kind of network topology in which all of the various devices in the network are connected to a single cable or line. Ответ: Выз Правильный ответ: Выз Вопрос 5 Верню Балоов 1,00 из 1,00 Write the correct word networking is a type of network topology in which a device (node) transmits its own data as well as serves as a relay for other nodes. Routers are used to provide the best and most efficient data path for effective communication. In the event of a hardware failure, many routes are available to continue the network communication process.	Choose the correct word and complete the sentence.
Ваш ответ верный. Правильный ответ: петwork Вопрос 4 Верно Баклок 1,00 кз 1,00 Write the correct word topology is a specific kind of network topology in which all of the various devices in the network are connected to a single cable or line. Ответ Виз Правильный ответ: Виз Вопрос 5 Верно Баклок 1,00 кз 1,00 Write the correct word networking is a type of network topology in which a device (node) transmits its own data as well as serves as a relay for other nodes. Routers are used to provide the best and most efficient data path for effective communication. In the event of a hardware failure, many routes are available to continue the network communication process.	Violating security measures or causing its interruptions is highly inappropriate.
Ваш ответ верный. Правильный ответ: network Bonpoc 4 Bonpoc 4 Bonio Быллов: 1.00 на 1,00 Write the correct word topology is a specific kind of network topology in which all of the various devices in the network are connected to a single cable or line. Oтвет Виз Правильный ответ: Виз Bonpoc 5 Benha Быллов: 1.00 на 1,00 Write the correct word networking is a type of network topology in which a device (node) transmits its own data as well as serves as a relay for other nodes. Routers are used to provide the best and most efficient data path for effective communication. In the event of a hardware failure, many routes are available to continue the network communication process.	○ a. bridge

In the event of a hardware failure, many routes are available to continue the network communication process.	Вопрос 4
Write the correct word. topology is a specific kind of network topology in which all of the various devices in the network are connected to a single cable or line. Ответ Виѕ Правильный ответ: Виѕ Вопрос 5 Верно Баллов: 1,00 из 1,00 Write the correct word. networking is a type of network topology in which a device (node) transmits its own data as well as serves as a relay for other nodes. Routers are used to provide the best and most efficient data path for effective communication. In the event of a hardware failure, many routes are available to continue the network communication process.	
ш topology is a specific kind of network topology in which all of the various devices in the network are connected to a single cable or line. Ответ: Виѕ Вопрос 5 Верно Баллов: 1,00 из 1,00 Write the correct word. ш networking is a type of network topology in which a device (node) transmits its own data as well as serves as a relay for other nodes. Routers are used to provide the best and most efficient data path for effective communication. In the event of a hardware failure, many routes are available to continue the network communication process.	
Правильный ответ: Bus Вопрос 5 Верно Баллов: 1,00 из 1,00 Write the correct word. networking is a type of network topology in which a device (node) transmits its own data as well as serves as a relay for other nodes. Routers are used to provide the best and most efficient data path for effective communication. In the event of a hardware failure, many routes are available to continue the network communication process.	Write the correct word.
Правильный ответ: Bus Вопрос 5 Верно Баллов: 1,00 из 1,00 Write the correct word, networking is a type of network topology in which a device (node) transmits its own data as well as serves as a relay for other nodes. Routers are used to provide the best and most efficient data path for effective communication. In the event of a hardware failure, many routes are available to continue the network communication process.	topology is a specific kind of network topology in which all of the various devices in the network are connected to a single cable or line.
Правильный ответ: Bus Вопрос 5 Верно Баллов: 1,00 из 1,00 Write the correct word, networking is a type of network topology in which a device (node) transmits its own data as well as serves as a relay for other nodes. Routers are used to provide the best and most efficient data path for effective communication. In the event of a hardware failure, many routes are available to continue the network communication process.	Otreet: Bus
Вопрос 5 Верно Баллов: 1,00 из 1,00 Write the correct word. networking is a type of network topology in which a device (node) transmits its own data as well as serves as a relay for other nodes. Routers are used to provide the best and most efficient data path for effective communication. In the event of a hardware failure, many routes are available to continue the network communication process.	
Вопрос 5 Верно Баллов: 1,00 из 1,00 Write the correct word. networking is a type of network topology in which a device (node) transmits its own data as well as serves as a relay for other nodes. Routers are used to provide the best and most efficient data path for effective communication. In the event of a hardware failure, many routes are available to continue the network communication process.	Позрильный отрот: Выс
Верно Баллов: 1,00 из 1,00 Write the correct word. networking is a type of network topology in which a device (node) transmits its own data as well as serves as a relay for other nodes. Routers are used to provide the best and most efficient data path for effective communication. In the event of a hardware failure, many routes are available to continue the network communication process.	правильный ответ, виз
Верно Баллов: 1,00 из 1,00 Write the correct word. networking is a type of network topology in which a device (node) transmits its own data as well as serves as a relay for other nodes. Routers are used to provide the best and most efficient data path for effective communication. In the event of a hardware failure, many routes are available to continue the network communication process.	
Write the correct word. networking is a type of network topology in which a device (node) transmits its own data as well as serves as a relay for other nodes. Routers are used to provide the best and most efficient data path for effective communication. In the event of a hardware failure, many routes are available to continue the network communication process.	Вопрос 5
networking is a type of network topology in which a device (node) transmits its own data as well as serves as a relay for other nodes. Routers are used to provide the best and most efficient data path for effective communication. In the event of a hardware failure, many routes are available to continue the network communication process.	
networking is a type of network topology in which a device (node) transmits its own data as well as serves as a relay for other nodes. Routers are used to provide the best and most efficient data path for effective communication. In the event of a hardware failure, many routes are available to continue the network communication process.	
to provide the best and most efficient data path for effective communication. In the event of a hardware failure, many routes are available to continue the network communication process.	Write the correct word.
the network communication process.

Вопрос 6
Верно Баллов: 1,00 из 1,00
Choose the correct word to complete the sentence.
They must also records for seven years.
 a. set up and manage
Ваш ответ верный.
Правильный ответ:
preserve
Вопрос 7
Верно Баллов: 1,00 из 1,00

Match the type of topology and its disadvantage.

Ваш ответ верный.

Правильный ответ:

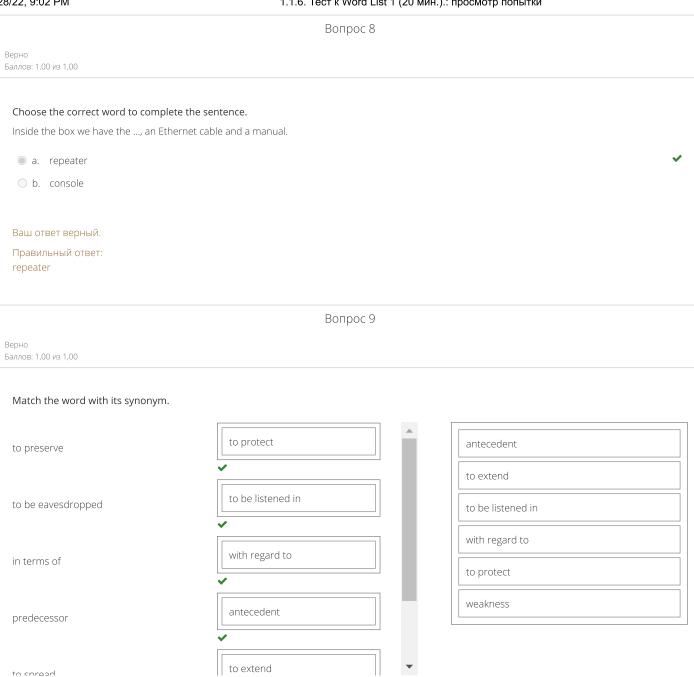

ring topology → if any individual connection in the ring is broken, the entire network is affected,

 $star topology \rightarrow Requires more cable than a linear bus . If the connecting network device (network switch) fails, nodes attached are disabled and can't participate in network communication,$

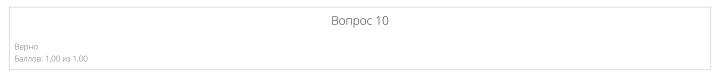

mesh topology → Power requirement is higher as all the nodes will need to remain active all the time and share the load,

 $tree\ topology \rightarrow If\ the\ computer\ on\ the\ first\ level\ is\ erroneous,\ the\ next-level\ computer\ will\ also\ go\ under\ problems,$

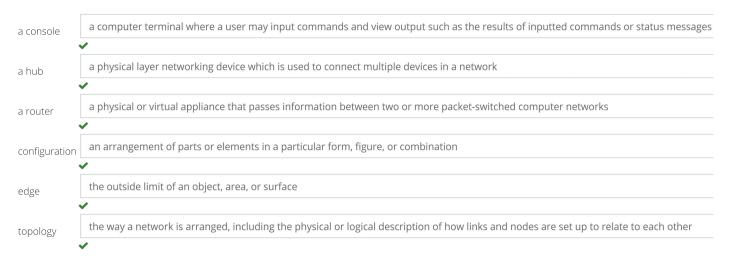

bus topology → if the main cable fails or gets damaged the whole network will fail

Ваш ответ верный.

Match the words with their definitions.

Ваш ответ верный.

Правильный ответ:

a console \rightarrow a computer terminal where a user may input commands and view output such as the results of inputted commands or status messages from the computer,

a hub \rightarrow a physical layer networking device which is used to connect multiple devices in a network,

a router \rightarrow a physical or virtual appliance that passes information between two or more packet-switched computer networks,

configuration → an arrangement of parts or elements in a particular form, figure, or combination,

edge → the outside limit of an object, area, or surface,

topology → the way a network is arranged, including the physical or logical description of how links and nodes are set up to relate to each other
